

Fast, secure cloud backup: Veeam Cloud Connect

EASY AND EFFICIENT OFFSITE BACKUP

In partnership with industry leader, Veeam®, Harbour IT provides powerful and reliable cloud backup to help you avoid the risk of catastrophic data loss. Veeam Cloud Connect offers your business:

A MODERN BACKUP ARCHITECTURE

Market leading technology including Backup Copy jobs with Built-in WAN Acceleration, forever incremental backups, GFS (grandfather-father-son) retention policies and more.

END-TO-END ENCRYPTION

All data is encrypted before leaving your network perimeter, in flight and at rest, without impacting the data reduction ratios of built-in compression and WAN Acceleration.

HOSTED OFFSITE BACKUPS

Backup your business critical data offsite to a hosted cloud repository through a secure SSL connection with no additional Veeam licensing required.

COMPLETE VISIBILITY AND CONTROL

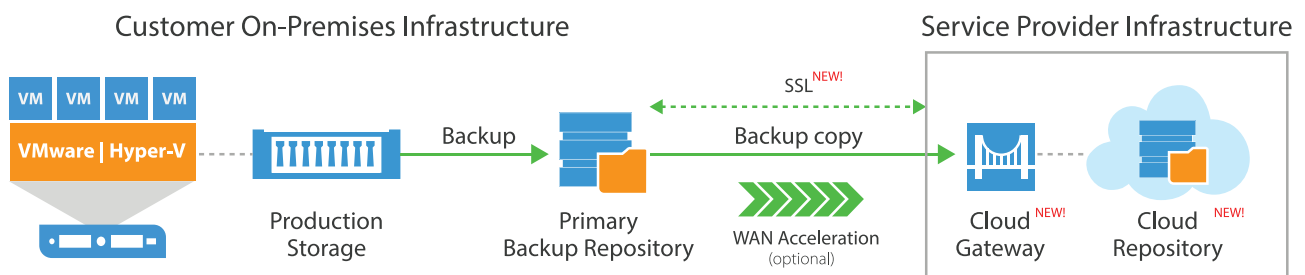

Access and recover data in hosted backup repositories directly from one console; track cloud repository consumption and receive reminders for hosted storage renewals.

THE 3-2-1 RULE

- 3 copies of data
- on 2 types of media
- 1 copy off site

Off site backup can be challenging due to limited bandwidth, data volumes and a lack of resources to build or maintain a true offsite backup repository.

Harbour IT cloud backup repository services take advantage of Veeam's Built-in WAN Acceleration technology and more to save investing in a second site or adding bandwidth.
